ABOUT ME

Passionate about the international movement of technology and driven by a fascination with logistics and manufacturing, my aim is to take advantage of my analytical skills to optimize global supply chains and ensure compliance with international standards.

EXPERIENCE

JPMorgan Chase & Co.

Aug 2024– Present

Software Engineer

NYC, NY

- Collaborated with 5 new grads under agile methodology to develop credit rewards web app.
- Led efforts on a compliance project for international data retention policies, ensuring adherence to laws across multiple jurisdictions.
- Deployed compliance project to production environment, ensuring reliability and scalability for global operations.

JPMorgan Chase & Co.

June 2023– Aug 2023

Software Engineer Intern

NYC, NY

- Implemented middleware authentication API using Java Spring Boot in collaboration with lead engineer.
- Gained hands-on experience with corporate frameworks, adapting quickly to new tools and methodologies.
- Strengthened networking and collaboration skills by engaging with peers and teams across the organization to understand broader operational goals.

BMO Bank

Jan 2023– Apr 2023

Cloud Infrastructure Intern

NYC, NY

- Revamped data storage, reducing file size by 8x, resulting in a significant storage cost reduction.
- Improved file retrieval latency from AWS servers.
- Monitored AWS CloudWatch during testing of file uploads to AWS S3 bucket and debugged log files.

Industrial Manufacturing Metaverse Digital Twin System

May 2022– Dec 2022

REU Undergrad Research

Buffalo, NY

- Collaborated with teammates to architect and design the system leveraging AWS to create digital twins for industrial manufacturing.
- Developed an interactive dashboard for real-time sensor data visualization of industrial machines in React.
- Published a [demo](#) for the ACM SenSys 2022 Conference, won the 2022 Russell L. Agrusa CSE Student Innovation Competition and is currently writing this paper to be published.

PROJECTS

Magic Painting Board | [Demo](#) | Python, Flask, React, Tensorflow

2022

- Collected, filtered, and preprocessed images using OpenCV library in Python to create a robust training dataset.
- Developed a Flask API to integrate the ml model and a React app for an interactive and visually engaging experience.

EDUCATION

University at Buffalo

Aug 2020 – May 2024

Computer Science B.S., 3.87 / 4.0, Magna Cum Laude

Buffalo, NY

SKILLS

Soft Skills: Analytical Thinking, Problem-Solving, Collaboration and Teamwork, Adaptability

Technology: Python, JavaScript, SQL, R, Java, React, AWS, Linux, Docker

Languages: English, Mandarin, German (novice), Japanese (novice)
